

2016 Annual Results

9 March 2017

Forward-looking statements

This presentation may contain forward-looking statements and information that both represents management's current expectations or beliefs concerning future events and are subject to known and unknown risks and uncertainties.

A number of factors could cause actual results, performance or events to differ materially from those expressed or implied by these forward-looking statements.

Agenda

2016 highlights	Tony Durrant
Financial results	Richard Rose
Refinancing update	Richard Rose
Production update	Tony Durrant
Portfolio potential	Robin Allan
Outlook	Tony Durrant

2016 highlights

Strong production performance

71.4 kboepd, above guidance, driven by high operating efficiency across the portfolio

Reduction in cost base

\$15.8/boe opex, 10% under budget;
Other savings in capex and G&A costs

Re-focussing the portfolio

Value accretive E.ON acquisition completed;
Disposal programme for non-core assets

Progressing Catcher

On target for mid-year sailaway and Q4 first oil;
Project costs down 29% against sanction

Increased 2P reserves and 2C resources

2P reserves increased to 353 mmboe;
Reserves and resources up by 10% to 835 mmboe

Financial performance

Net debt reduced from peak levels
Profits of \$123m for full year (2015: \$ 1.1 bn loss)

Refinancing substantially complete

Liquidity preserved and covenants headroom expanded;
Debt maturities re-set at 2021 or beyond

Financial results

Richard Rose

Financial highlights and outlook

2016 highlights

- Profitable and positive operating cash flow
- Low and stable operating costs of \$15.8/boe
- Reduced capex commitments
- Net debt down from peak in Q3 2016

Outlook

- Refinancing expected to complete by end of May
- E.ON acquisition to reach payback earlier than anticipated
- Cash flow positive in 2017; accelerated debt reduction once Catcher on-stream
- Targeting Net Debt/EBITDA <3x by end 2018

Opex (\$/boe)

	2015	2016	2017F
UK	30.0	24.4	21.4
Vietnam	11.7	8.7	10.9
Indonesia	10.0	10.1	10.1
Pakistan	3.7	3.7	4.0
Group	15.5	15.8	15.9

Positive operating cash flow

	12 months to 31 Dec 2016 \$m	12 months to 31 Dec 2015 \$m
Working Interest production (kboepd)	71.4	57.6
Entitlement production (kboepd)	66.1	53.4
Realised oil price (US\$/bbl) – post hedge	52.2	79.0
Realised int'l gas price (US\$/mcf) – post hedge	4.9	6.0
Realised UK gas price (p/therm) – post hedge	47.6	-
	\$m	\$m
Cash flow from operations	492	903
Taxation	(61)	(94)
Operating cash flow	431	809
Capital expenditure	(678)	(1,070)
Decommissioning cash escrow	(62)	-
Acquisitions / disposals	(119)	220
Finance and other charges, net	(152)	(101)
Net cash in (out) flow	(580)	(142)
Net Debt	(2,765)	(2,242)

Capital expenditure (\$m)

	2016	2017F
Exploration	\$102	\$50
Development	\$550	\$290
Abandonment	\$27	\$50
Total	\$678	\$390

2017 liquids and UK gas hedging

Oil hedges	% hedged	Price (\$/bbl)
Fixed price oil hedges	21%	50.8
Oil option sales	16%	50.7

UK gas hedges	% hedged	Price (p/therm)
Fixed price	41%	49.6

Return to profit 2016

	12 months to 31 Dec 2016 \$m	12 months to 31 Dec 2015 \$m
Sales and other operating revenues	983	1,099
Cost of Sales	(773)	(661)
Impairments	(556)	(1,024)
Gross profit/(loss)	(345)	(586)
Exploration/New Business	(58)	(109)
Reduction in decommissioning estimate	76	-
General and administration costs	(24)	(14)
Gain (loss) on disposals (incl. E.ON excess over acquired value)	207	1
Operating profit/(loss)	(145)	(708)
Financial items	(245)	(122)
Profit/(loss) before taxation	(390)	(830)
Tax credit/(charge)	522	(241)
Loss from discontinued operation	(9)	(33)
Profit/(loss) after taxation	123	(1,104)
EBITDAX¹	526	752

Refinancing

Richard Rose

Refinancing – timetable to implementation

Refinancing terms

Debt type	Key amended terms
Private lenders (\$3.3bn) - RCF & LC: \$2.5bn - Term Loans¹: \$314m - USPP¹: \$380m - Schuldschein: \$130m	- Total facilities confirmed - Alignment of maturity dates to 31 May 2021 - Amendment of financial covenants - Enhanced economics - A security package - Corporate governance controls
Retail bonds (£150m)	- Maturity date extended to 31 May 2021 - Enhanced economics - Security package, ranking alongside the private debt facilities
Convertible bonds (\$245m)	- Maturity date extended to 31 May 2022 - Interest rate to remain at 2.50% - Conversion price reset - Equity warrants - No cash amendment fee - Issuer call after 1 year at 140% of conversion price

¹ FX as at when facilities entered into

Facilities confirmed¹

Maturities extended¹

Outlook

- Cash and undrawn facilities of \$593m
- Cash flow positive at forward curve; debt reduction accelerating once Catcher on-stream
- Targeting Net Debt/EBITDA <3x by end 2018

Producing portfolio

Tony Durrant

Production overview

Chim Sáo, Vietnam (53.125%, operator)

2016 highlights

- Operating efficiency of 94%
- \$8.7/boe operating cost
- Strong reservoir performance
- Reduction in FPSO lease rate
- Reserves increase of 13 mmboe

Outlook

- 2 infill wells planned in 2017
- Field life extended to 2028

Improved Production Profile
kboepd (gross)

55 mmboe
at sanction

57 mmboe
produced to
date

59 mmboe
reserves
remaining

Natuna Sea Block A, Indonesia (28.67%, operator)

2016 highlights

- Singapore demand above take or pay
- 44% of GSA vs 41% contractual share
- Record deliveries under GSA2
- Operating efficiency >90%
- Opex of \$8.3/boe

Outlook

- Singapore demand stable
- GSA1 market share increasing
- Lama well tied into production (Q3 2017)
- Gajah Baru infill drilling opportunities
- BIGP first gas 2019

NSBA Production net to PMO
(kboepd)

Market Share GSA1
(%)

BIGP

93 Bcf
\$340m
gross capex

30% IRR

Huntington, Central North Sea (100%, operator)

2016 highlights

- Increased equity to 100%
- Production significantly increased
 - High operating efficiency
 - Strong reservoir performance

Outlook

- FPSO lease extension discussions underway

Currently
producing
~15 kboepd

Solan, West of Shetlands (100%, operator)

2016 highlights

- First oil achieved
- Operational concept working well
- Central reservoir on prognosis

Outlook

- Eastern area of field under-performing
- Secured Transocean Spitzbergen rig at competitive rate to install 2 ESPs in P1

Elgin-Franklin, Central North Sea (5.2%)

2016 highlights

- 105 kboepd for 8 months to 31 December 2016
- Strong winter gas demand
- Low opex of \$6.3/boe

Outlook

- Long field life; production forecast to continue until 2037
- 350 mmboe remaining reserves
- Ongoing infill drilling, well intervention programme & exploration upside

Portfolio potential

Robin Allan

Portfolio potential

Catcher

Tolmount

Cash flows prioritised towards debt reduction and selective reinvestment

Sea Lion

Exploration

700 mmboe of
discovered but
undeveloped
reserves &
resources

Catcher – under budget, start up 2017 2H

2016 Highlights

- Subsea installation programme successfully completed below budget
- 9 wells completed to date with excellent operational performance
- Fabrication of FPSO hull completed and all topside modules lifted onto vessel
- Capex reduced by 29% to \$1.6bn

Catcher FPSO progress since 2015

March
2015

June
2016

March
2017

Catcher outlook

Yard-based pre-commissioning and commissioning of FPSO

FPSO sailaway and transit to North Sea

FPSO hook up & final commissioning

Improved production profile anticipated

Today

2017

First oil

2018

Drilling at Varadero

• 1 well

Drilling at Burgman

• 2 wells

Drilling at Catcher

• 4 wells

Drilling at Burgman

• 2 wells

12 wells
on-stream
at first oil

Well count
reduced
to 20

Tolmount – next phase of growth

Timetable to sanction

- Most significant discovery in SNS since 1997
- Concept selected Q1
 - Standalone, normally unmanned
 - 4 platform wells
 - 48km x 20" gas export to onshore
- Offshore FEED contract awarded; engineering commenced
- Potential 3rd party infrastructure funding
- FID targeted for Q1 2018

Indicative metrics

- ~1 Tcf potential (GTA)
- Capex ~\$550m
- Designed for daily peak production of 300 mmcfd
- First gas 2020

Tolmount – project timeline

Tolmount – future phases planned

Tolmount East

- Subsea tie-back or small platform

Tolmount Far East

- Subsea tie-back or small platform to Tolmount or Tolmount East

Mongour

- Subsea tie-back or extended reach well from Tolmount East

3rd party business potential

- A new hub with 20+ year life

Tolmount area
~ 1 Tcf

Southern Gas Basin: portfolio of opportunities

Tolmount Main (50% op)

- On path to sanction

Tolmount Area (50% op)

- Future phases in planning

Ravenspurn North Deep (5% carried interest)

- Play-opening carboniferous well

Babbage (47% op)

- Infill opportunities

Cobra (50% op)

- Appraisal planning underway

Portfolio of opportunities which are economic at low gas prices

10km

- Premier interests
- Gas field/discovery
- Prospects/leads

Sea Lion

Highlights

- FEED substantially completed
- Breakeven reduced to \$45/bbl
 - Capex to first oil reduced to \$1.5bn
 - Field opex reduced to \$15/bbl
 - Indicative FPSO cost of \$10/bbl (LOF)

Outlook

- Positive commercial and fiscal engagement with FIG
- Positive engagement with contractor market and export credit government funding sources
- Licence extension to April 2020

Exploration update – Mexico

- Exercised option to increase to 25% in Block 7, Mexico
- 100-500 mmbbl prospect in 165m of water
- Drilling Q2 2017, rig contracted

Portfolio potential

Outlook

Tony Durrant

2017 – Targets

Production	Maintain operating efficiency levels; Meet guidance of 75 kboepd (excluding Catcher)
Cost Base	Targeting further reductions in opex and G&A costs
Non-core disposals	Realise >\$100m from non-core disposals
Catcher	Deliver first oil in 2017; build on development drilling programme to optimise forward production; further cost reduction
Tolmount	Progress FEED and commercial discussions for Premier Board approval in Q4
Future Growth	Financing and commercial initiatives to bring Sea Lion to next phase in 2018
Exploration	Identify and test best prospects eg Mexico (2017)
Net debt reduction	Positive net cash flow, post disposals

Looking forward

Strategy

- Optimise quality producing assets in UK, Vietnam, Indonesia
- Falklands, Mexico, Brazil offer transforming upside
- Continuing programme of disposals

Financial flexibility

- De-leveraging from free cash flow
- Covenant and liquidity headroom
- Stable and low cost base

Selective growth opportunities

- Tolmount – high quality project
- Optimising Sea Lion
- Material exploration upside in SNS, Mexico & Brazil
- Potential UK acquisitions

Forward Position

- 80-90 kboepd; \$15-20/bbl opex long-life asset base
- Balance sheet debt reduction
- Highly leveraged to further oil and gas price recovery
